Viktor Ahnström

Software Engineer
Göteborg, Sweden

SUMMARY

Newly graduated software engineer (BSc, Jönköping University) with hands-on fullstack, mobile, and AI experience. Built and shipped a React Native app to the App Store and Google Play as sole developer during internship, and developed a deepfake detection framework with explainable AI as degree project. Looking for a junior or graduate developer role in the Gothenburg area.

EXPERIENCE

Lead Developer – Friends Of Claudia (Internship)

Apr 2025 – Jun 2025

Gothenburg

- Sole developer of a React Native (Expo) mobile app for iOS and Android, shipped to the App Store and Google Play.
- Set up automated build, test and deployment pipelines with GitHub Actions (CI/CD) end to end.
- Integrated REST APIs for data communication with external services; drove the project independently from planning to delivery.

Various Roles – Ryhov County Hospital (Region Jönköping)

Aug 2019 – Present

Jönköping

5+ years part-time across several roles alongside full-time studies; currently on study leave.

EDUCATION

Jönköping University

2022 – 2026

BSc in Engineering – Software Development and Mobile Platforms (incl. technical foundation year)

PROJECTS

XADE – Deepfake Detection with Explainable AI (Degree Project)

Python, FastAPI, PyTorch, React, TypeScript, OpenAI API, Gemini API

Fullstack framework with a FastAPI backend and React/TypeScript frontend that classifies images as real or deepfake using PyTorch models and generates plain-language explanations via external LLM/VLM APIs (OpenAI, Gemini). Designed for non-expert users.

Portfolio & CMS

Next.js, TypeScript, Supabase, Vercel, Tailwind CSS

Designed and deployed a fullstack portfolio site with a custom-built CMS including authentication and content management, hosted on Vercel with Supabase as the backend.

FlexiCharge

SwiftUI, iOS, Scrum, REST API

iOS app for EV charging infrastructure, developed in a cross-functional Scrum team in collaboration with KnowIt.
